Free Pest Solutions Online

Infopest – AgVet pest solutions now available free online

Australia's premier information source on registered agricultural and veterinary chemicals is now available free online.

Infopest is a user-friendly, easily searchable database of all nationally registered agricultural and veterinary (AgVet) chemical products, and APVMA off-label permits.

The powerful Infopest search engine enables users to easily identify Australian registered agricultural and veterinary products by :

- Particular host crops
- Specific pests (weed, disease, insect)
- Current registered control products
- Search for active constituents
- Search by product name

or any combination of these categories.

INFOPEST

The **CRC for Invasive Animals**, have just released a free Apple iphone Application, the first of its kind in Australia.

www.invasiveanimals.com

The App provides feral animal photo galleries and distribution maps including footprints, animal calls, and control techniques, as well as quick links to important pest control resources for 31 of Australia's worst pest animals.
